HYDROJELLY®

Hydrojelly® masks are **infused with electrolytes** to boost skin hydration (just drinking water is not enough). The masks **form a vacuum-like seal** that compresses facial contours. These masks are **formulated with refined algae, electrolytes and organic active ingredients** to provide a unique silky texture and blankets the skin. This intensive facial compression allows for complete absorption of organic nutrition and electrolytes to the deep layers of the skin (nutrition from the mask and also other ingredients still remaining on the skin from previous treatment). The masks have an instant cooling and soothing effect that is not only refreshing, but helps firm, soothe and revitalize the skin for a natural subtle glow.

ACTIVATE WITH WATER

esthema® prefers to avoid chemicals and preservatives, like parabens, that are found in gel and liquid activators. Our dry powder formula keeps ingredients fresh while retaining all the natural benefits. Distilled water is recommended for activating all the ingredients in the masks prior to application.

LIQUID NEEDLE PDRN AMPOULE

Revolutionizing Skincare With Advanced Absorption Technology

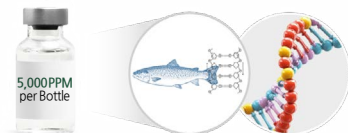

Spicule spic-ule / spikyool/ (noun)

Spicules are naturally occurring, vegan, 100% ecological nano-biological structures derived from marine sponges. These needle-like formations act as a natural alternative to traditional microneedling.

PDRN (Polydeoxyribonucleotide; Salmon DNA)

PDRN is a skin-rejuvenating ingredient derived from salmon DNA, which closely resembles human DNA, allowing it to integrate seamlessly into the skin's natural repair processes.

LIQUID NEEDLE PDRN AMPOULE 558

This non-invasive liquid microneedling therapy enhances ingredient absorption, boosts collagen and elastin production, and exfoliates dead skin cells for rejuvenated skin. Mimicking traditional microneedling without discomfort, ultra-fine spicules create micro-channels for deeper ingredient delivery. As the skin heals, collagen and elastin production increase, improving elasticity and structure, while the spicules are naturally expelled or exfoliated within 72 hours, leaving the skin smoother, firmer, and more radiant.

Tightening & Lifting Treatment, Firming & Contouring Effects, Rejuvenating.

5ML 5 AMPOULES

HOW TO USE LIQUID NEEDLE

1. **Pre-Treatment Skin Prep:** Use a gentle cleanser to remove makeup and impurities. For a double-cleanse, follow with the esthemax® Enzyme Mask to purify the skin and support ampoule absorption. Keeping the skin clean and hydrated helps reduce discomfort during treatment.

2. **Apply a thin layer over the entire face** avoiding the eye and lip areas. Or apply 2-3 drops directly onto targeted areas while keeping away from the eye and lip areas.

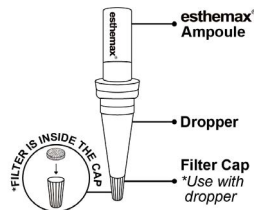

3. **Use a gentle tapping motion until fully absorbed.** This helps stimulate micro circulation and ensures deeper penetration. Tapping also reduces sensitivity or discomfort during and after absorption. Apply firm pressure on problematic areas (such as fine lines, enlarged pores, or dull spots) to enhance absorption and boost targeted results.

4. **Post-Treatment Skin Care:** Follow up with a moisturizer or cream to lock in hydration, or apply a targeted serum to address specific skin concerns at this stage.

OPTIONAL: Apply a calming or hydrating sheet mask to support the healing process. Always apply sunscreen to protect the skin.

AMPOULE

***After opening, attach the dropper and leave the cap on, as it functions as a filter.**
